Ad Quadratum The Practical Application

The purpose of the project is to provide the most up-to-date survey on issues dealing with practical geometry and how it might have been applied in the design of medieval architecture.

Chronologically, the topics cover a wide span - from early Medieval through Late Gothic.

Geographically, the monuments under discussion range from Early Medieval Florence through Carolingian Germany, Crusader Cyprus, Romanesque France and Gothic England.

Ad Quadratum - GBV

The same act of geometry can yield an intersection forming an angle of 60 degrees. These two angles lie at the base of the two great systems of Masonic geometry, Ad Quadratum and Ad Triangulum, that is 'of the square' and 'of the triangle', respectively, and, through their marriage emerges an infinity of form.
