such as nutritional requirements, metabolic studies, body composition, energetics, immunology, neuroscience, microbiology, genetics and molecular and cell biology related to nutrition and applied aspects of animal nutrition, such as raw material evaluation, feed additives, nutritive value of novel ingredients, and feed safety.

Animal Nutrition | Journal | ScienceDirect.com by Elsevier

Animal Nutrition. Meeting livestock nutritional requirements is extremely important in maintaining acceptable performance of neonatal, growing, finishing and breeding animals. From a practical standpoint, an optimal nutritional program should ensure adequate intakes of amino acids (both traditionally classified essential and nonessential), carbohydrates, fatty acids, minerals, and vitamins by animals through a supplementation program that corrects deficiencies in basal diets (e.g., corn- and ...
