AppleScript for converting InDesign to Photoshop ...

For my final tip at last week's PEPCon, I showed a little AppleScript for working with IDML that I found on an InDesign scripting forum. It was written by renowned AppleScripter Shane Stanley of AppleScript Pro Sessions and it allows you to drag and drop an IDML file on to the script (compiled as an application) to unzip the IDML into a folder structure.

Drag and Drop AppleScripts for EPUB, IDML, etc. - InDesign

In order to hide an object, choose the object and select Object > Hide. To unhide or show hidden objects, select Object > Show All On Spread. First in the Layers panel > click the eye icon next to

Where To Download Applescript For Hiding The Indesign Document

the object you want to hide. And click again to redisplay the item. Now if you hide a layer or group > all items in the layer or group are hidden.
