Do You Code Sign Correctly? Best Practices | Venafi

Venafi Trust Protection Platform (VTPP) allows you to integrate workflow management processes with its management of certificate lifecycles. Using Workflow objects, you can require approvals or run SSH or PowerShell commands at stages of the certificate lifecycle.

Info: Best Practice Workflows - Venafi Customer Support

The common element in these three options is the best practices. For example, if you centralize SSH management, the team that does that is going to need a clearly defined set of best practices to use in their processes. If you keep management decentralized and define policies, your policies need to be guided by a set of best practices.
