...

Drawing on organizational theory and empirical observation, the contributors specifically highlight organizational design aspects of business model innovation, focusing on how reward systems, power distributions, routines and standard operating procedures, the allocation of authority, and other aspects of organizational structure and control should be designed to support the business model the firm chooses.

## **Business Model Innovation: The Organizational Dimension**

...

Business model innovation is an iterative and potentially circular process. A business model describes the rationale of how an organization creates, delivers, and captures value, in economic, social, cultural or other contexts. The process of business model construction and modification is also called business model innovation and forms a part of business strategy.

## **Business model - Wikipedia**

Business model innovation describes the innovative processes and rationale of how an organization creates, delivers and captures value as opposed to how to create a new product or service. For example, Google rose to power using business model innovation, not by inventing the internet or computers.

Business model innovation seeks to align the elements of a  
business model to a particular environment. Complex, dynamic,  
and interconnected environments require agile and continuous  
adaptation. Generally speaking, alignment can be achieved in  
two different ways (Dorst and Dijkhuis, 1995).
