Caesalpinia - World Flora Online

Caesalpinia major is treated as a synonym of Caesalpinia globulorum Bakh.f. & P.Royen in some treatments. In a recent revision of the genus (Edeline Gagnon et al; A new generic system for the pantropical Caesalpinia group (Leguminosae) PhytoKeys 71: 1-160; 2016), it has been proposed that this species be renamed Guilandina major (DC.) Small.

Caesalpinia major - Useful Tropical Plants

Caesalpinia is a genus of flowering plants in the legume family, Fabaceae. Historically, membership within the genus has been highly variable, with different publications including anywhere from 70 to 165 species, depending largely on the inclusion or exclusion of species alternately listed under genera such as Hoffmannseggia. It contains tropical or subtropical woody plants.
