A comprehensive review of data envelopment analysis (DEA ...

Data envelopment analysis (DEA) is one of the non-parametric methods for estimating production frontiers. This analysis is used measuring the efficiencies of a set of decision-making units (DMU) using multiple inputs and outputs. By assigning specific weights to the input and output variables and through the allocation of equal weight to each units, DEA is used to derive efficient units.

Data envelopment analysis (DEA) is a nonparametric method in operations research and economics for the estimation of production frontiers. It is used to empirically measure productive efficiency of decision making units (DMUs). Although DEA has a strong link to production theory in economics, the tool is also used for benchmarking in operations management, where a set of measures is selected ...
