Linux device drivers (second edition). Ed. O'Reilly. This book is available for free on the internet. Jonathan Corbet. 2003/2004. Porting device drivers to the 2.6 kernel. This is a very valuable resource for porting drivers to the new 2.6 Linux kernel and also for learning about Linux device drivers. B. Zoller. 1998.

Writing device drivers in Linux: A brief tutorial

Major = register_chrdev (0,DEVICE_NAME, &fops); The register_chrdev function basically gets the Major number of the driver as first parameter. For the kernel the Major number is the identifier of a driver and it will be linked to the device name handed to the register_chrdev function as the second parameter.

Simple I/O device driver for RaspberryPi - CodeProject

If you are having issues trying to find a correct driver for a device on one PC, but have a working driver on another computer, you can easily transfer the driver from one PC to another. Windows stores a copy of each installed driver in C:\Windows\System32\DriverStore\FileRepository folder.

Copy drivers from one computer to another

Now I have added another SSD to my computer which is a 240Gb. I do not have any other storage media at hand at the moment (e.g. external hard drive). Since the new 240GB drive has obviously more capacity and is faster (a newer generation than my 120GB one), I want to move my Linux to this new drive.
