a control group in an experiment. To compare the results.
Controlled variables or soil experiment. Type of soil type of

Experimental Variables Answer Key Pogil

When scientists set out to do an experiment, they first think
about the variables that may affect the outcome of the
experiment. A variable is any condition that may cause a change
in the system being studied. Some variables are measured
quantitatively, like temperature, mass or height. Other variables
are recorded in a qualitative manner, like color, texture or
species.
