Future Cities - HSBC

I've been fortunate throughout my career to visit, work and live in a great number of countries with outstanding cities. Cities are home to about half of the world's population, generating 70% of CO 2 emissions and we expect both figures to grow with increased urbanization over time.. There's certainly appetite to decarbonize our cities and many around the world are tackling emissions with ...

Our Future in Cities. Globally, over 50% of the population ...

Today's cities are larger and more diverse than ever. More than half of the world's population now lives in urban centers, and this proportion is expected to increase to nearly 70 percent by 2050. 3 While urbanization has helped improve living conditions for millions of people around the world, there are often chronic economic and social disparities among city dwellers.
