For a better introduction to most EW systems, I would refer the reader to Neri's Introduction to Electronic Defense Systems, Second Edition (Artech House Radar Library). Neri's text is a very comprehensive introduction to many types of EW systems (used in surface-to-air, air-to-air, air-to-surface, surface-to-surface including anti-ship, but not submarine warfare), though Neri's text doesn't address modeling and simulation.

You will be introduced to the three “pillars” of EW: Electronic Attack (EA) systems, Electronic Protection (EP) techniques, and Electronic Support (ES). An EW engagement model will be developed to illustrate the interaction between radar and jamming signals and the impact in radar detection and tracking. In addition, several EA techniques will be introduced and modeled, and the effects of radar performance will be explored.
