Environmental impact assessment and planning and conservation of natural resources can govern these issues. Environment impact can be observed on the following parameters: 1. Impact on soil, water and air quality.

### **Brief notes on the Environmental Impact Assessment (EIA)**

Environmental impact assessment (EIA) is a tool to aid environmental decision making. It is a process that allows for public involvement when positive and negative impacts (opportunities and constraints) that are associated with a proposed course of action are assessed. The aim of this is to determine the best practicable course of action.

### **Environmental Impact Assessment (EIA)**

Environmental assessment is the process by which the consequences and effects of natural processes and human activities upon the environment are estimated, evaluated or predicted<sup>1</sup>. Assessments can include within their scope ways to minimise, mitigate or eliminate those effects, and even to compensate for their impact<sup>1,2</sup>.
