Person-Centered Therapy | Psychology Today

1. Treat people with dignity, compassion, and respect. Patients often lose their independence when they enter care, which puts their dignity at risk. Person-centred care enables you to maintain that dignity by respecting their wishes and treating them with compassion and empathy.

Person-Centred Care: What is it & Why is it Important?

Person-centred care can focus on people's individual health needs, but it is also about involving people in planning and evaluating services. Words such as 'co-production' and 'co-design' have been used to describe involving people in developing services and assessing their quality.

What is person-centred care and why is it important?

Person-centred care moves away from professionals deciding what is best for a patient or service user, and places the person at the centre, as an expert of their own experience. The person, and their family where appropriate, becomes an equal partner in the planning of their care and support, ensuring it needs their needs, goals, and outcomes.

Person-centred care: Prevention practice examples and

...

Person centred practice are ways of commissioning, providing and organising services rooted in listening to what people want, to help them live in their communities as they choose.

NVQ level 5 Lead person centred practice Example | Graduateway

As well as informing choice, preferences and community connections of the broader element of the person's life, the "ELP" approach to person centred practice also allows for specific goals, similar to those in "PATH" and "MAPS". Again person centred tools are used.
