Religion | Psychology Today

The psychology of religion attempts to predict consequences of religious belief. Based on their research, psychologists might anticipate that a particular belief will cause those who believe it to respond in a certain way. For instance, people who believe that the end of the world is imminent might be more likely to withdraw from society.

The anthropologist Edward Burnett Tylor (1832-1917) defined religion as belief in spiritual beings and stated that this belief originated as explanations of natural phenomena. Belief in spirits grew out of attempts to explain life and death. Primitive people used human dreams in which spirits seemed to appear as an indication that the human mind could exist independent of a body.
