Mitsubishi Mini Split Air Conditioners, Ductless Heat ...

“ Split systems ” are the air conditioners that provide cooling to different “zones” within a home. These systems, unlike window units or portable air conditioners, are not self-contained appliances, but as the name suggests, are comprised of a two-part system. These are most commonly used in buildings without a comprehensive duct system.

8 Types of Air Conditioners (2020 Buying Guide)

A split air conditioner is composed of two separate units, a condensing unit and an evaporative coil (known as a “condenser,” and a “coil” respectively in short-hand or slang). It is from these two separate units that a split air conditioner gets its name. These units are joined by a set of copper tubing known as a “line-set,” which transfers refrigerant from one unit to another.

What is a Split Air Conditioner? Split vs Packaged AC Units

Split/Multi-Split Type Air Conditioners Daikin’s split and multi-split type air conditioning systems offer superior performance, energy-efficiency, and comfort in stylish solutions conforming to all interior spaces and lifestyles. Bosch Split-Type Ductless Air Conditioner / Heat Pump

Prevent mold in your ductless air handlers. One of the easiest ways to prevent mold from building up in your ductless air handlers is by not immediately turning off the system when you don't need it. Mini splits don't cycle on and off like conventional air conditioners. Instead, they often run in the background in a low-power mode.
