Figure 81—A general rule of thumb for stairs: twice the riser plus the tread should equal 635 to 686 millimeters (25 to 27 inches). The most important area of the step is usually the tread. This is where most users step as they climb. The top of the step (and landing) should be stable and provide secure footing.

A French bulldog foster puppy conquered a set of stairs in Perth, Western Australia on November 22. Footage posted to social media showed the cleft palate pup, Jagger, struggling to climb up three steps. The owner of the footage told Storyful that Jagger is being raised by Perth-based organisation No Pup Cleft Behind, which rescues dogs born with cleft palates.
