### The Green Revolution Worksheet Answers

The Green Revolution was a technology package comprising material components of improved high yielding varieties of two staple cereals (rice and wheat), irrigation or controlled water supply and improved moisture utilization, fertilizers, and pesticides, and associated management skills. Benefits

### The Green Revolution

The Green Revolution was a period when the productivity of global agriculture increased drastically as a result of new advances. During this time period, new chemical fertilizers and synthetic herbicides and pesticides were created. The chemical fertilizers made it possible to supply crops with extra nutrients and, therefore, increase yield.

### Green Revolution Flashcards | Quizlet

By the 1970s, it became apparent that Green Revolution technologies were biased in favor of large, highly capitalized farmers and thus accentuated social inequalities. Government institutions began reaching out to small farmers with the goal of incorporating them into industrial agriculture. Credit, training and input packages were extended to peasants under the assumption that "early adopters" would survive and grow, while late- or non-adopters would be forced out of agriculture and ...
