Road to IP Telephony Success - Brinks Gilson

Starting in the mid, to late 1990s, the Internet and the TCP/IP protocol began to drive the telephone and communications industry to change. The Internet Protocol became the transport for almost all data communications. Today, all communication carriers are using an IP infrastructure for a part, or for all of its voice services.

What is IP Telephony and how it can be used?

IP telephony uses "internet protocols" to communicate by digital means over the internet. By using this technology rather than
