A tooth extraction is a procedure to remove 1 or more teeth. A tooth extraction can cause pain, swelling, and minor bleeding. It can also cause you to have trouble opening your mouth completely. DISCHARGE INSTRUCTIONS: Return to the emergency department if: You have bleeding that has not decreased within 12 hours after your tooth extraction

### **Tooth Extraction (Aftercare Instructions) - What You Need ...**

Tooth extraction is a dental procedure in which a tooth is pulled out of the socket in the bone where it rests. Pulling teeth (extraction) may be necessary in cases of a deep cavity, wisdom teeth, broken teeth, and several other instances. However, some deep cavities can be restored — only unrestorable teeth would be candidates for extraction.

This book is a very concise guide to extractions. I have been a practicing dentist for 13 years and wish I had read this book when I was in dental school. The illustrations are simple but helpful. I am half way through the book and have already used quite a bit of the information in my dental office. Worth the cost for sure.
